Please followed the steps to create a app and connect quick book account:-

1) https://developer.intuit.com/v2/ui

Open this url and enter the login credentials.

After login click "My Apps" menu at the top menu bar and click create new app image.

After that click just start coding "select api" section and then check the "Accounting" checkbox section in the popup and click create app button.

After whole process you will see your created app dashboard.
